FALL PLANTING FOR 1958

The following list contains the various sorts and varieties of Spring flowering Bulbs which we have to offer for Fall planting. With over 40 years of experience in the importation and handling of fine Holland bulbs, we consider the following varieties the best performers in their classes.

TULIPS

Tulips include a great number of beautiful and interesting varieties. They are of easy culture, growing equally well in either a sunny or shady location. Bulbs should be planted in well prepared beds. If the soil is heavy, the addition of some sand and bonemeal will help the growth and bloom ability of the bulbs.

In planting tulips it is recommended that bulbs be planted in groups instead of in single lines. Groups of six to twelve tulips of one variety are very effective.

DARWIN TULIPS

CHARLES NEEDHAM (26") Brilliant red, large flower.

\$1.50 per doz. \$11.00 per 100
